Immigration Visit Information

Immigration visits are \$300 and include the examination, tuberculosis test, blood drawing and initial form completion. If the tuberculosis test is positive, you will be sent for a chest x-ray. If you have insurance, the chest x-ray will be billed to your carrier directly. You are responsible for any applicable copayment, coinsurance or deductible. Self pay patients you will be charged \$100 additionally for the chest x-ray. Immigration visits are not reimbursable by any insurance carrier as there is no applicable CPT code to bill your insurance carrier. Please note that replacement forms are available for an additional fee.

Any other services are billed separately and are not part of the immigration services. You will be invoiced directly by the laboratory for any blood tests. You are responsible for any applicable copayment, coinsurance or deductible for laboratory services. You will be invoiced directly by radiology for any radiology services.

Vaccinations may be billed to your insurance carrier as a courtesy. If they are not covered, they will be invoiced to you directly. Please note that Magnacare and GHI do not cover preventative vaccinations and you will be required to pay for vaccinations at the time of service.
